

TEST COMBINATIONS FOR 2023-24 TEI ACHIEVEMENT STATISTICS

Test combinations are preliminary (November 29, 2023)

For the Classroom Effectiveness Index (CEI) and Academic Peer Group (APG), each current test has required scores from one or two tests from the prior school year. For more information on how scores from the prior school year are used in calculations, refer to the TEI rulebook available from the TEI resources page <https://tei.dallasisd.org>

Classroom Effectiveness Index Students must have both required test scores from the prior year to be eligible for inclusion in a teacher's CEI statistic. Some current tests have more than one pair of prior tests that can be used in modeling. Only one combination will be considered for a student. The first option listed is the first one selected. If scores are not available from that combination of assessment in the prior year, the next option is selected, and so on.

Academic Peer Group Students must have the required test score from the prior year to be eligible for inclusion in a teacher's APG statistic. Some current tests have more than one possible required test from the prior year that can be used in modeling. Only one score from a prior year test will be considered for a student. The first option listed is the first one selected. If no score is available from that assessment in the prior year, the next option is selected, and so on.

the NWEA's MAP Growth assessment. ENG=English SPN=Spanish.
